Noida (INDIA)

PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience in software development, testing, debugging, and technical project work. Strong foundation in Data Structures & Algorithms, Object-Oriented Programming, and DBMS, with practical experience using Python, C++, Java, and SQL. Experienced in building and validating software applications, working with databases and web technologies, and contributing to Agile/SDLC-based activities.

EDUCATION

B.Tech in Computer Science & Engineering

2023 - Present

Noida Institute of Engineering and Technology, Greater Noida

CGPA: 8.34

Senior Secondary (Class XII), Science Stream

2021 - 2023

Assisi Convent School, Noida

Percentage: 87.2%

INTERNSHIP EXPERIENCE

Software Testing Intern - DEHIX

Mar 2025 - May 2025

- Executed functional, UI, responsive, and cross-browser testing across 10+ web application modules on desktop and mobile environments.
- Designed and executed 25+ test scenarios, identifying, documenting, and tracking 25+ defects through structured bug reporting.
- Collaborated with developers to verify fixes and perform regression testing, contributing to SDLC, Agile, and test documentation activities.

PROJECTS

Insurance Management System - Full-Stack Web Application

Apr 2026 - May 2026

- Developed a full-stack insurance management application using Spring Boot and MVC architecture, supporting policy, subscription, and claim workflows.
- Implemented user/admin role-based workflows including authentication, policy purchase, claim submission/tracking, and administrative approval/rejection.
- Integrated JPA/Hibernate with MySQL and implemented business-rule validations such as duplicate-policy prevention and deletion safeguards.

Mind-Well ML - Transformer-Based Psychological State Classification System

Feb 2026 - Mar 2026

- Built an end-to-end Transformer-based NLP classification system using DistilBERT to classify text into 7 psychological-state categories.
- Implemented preprocessing, tokenization, label encoding, stratified data splitting, model fine-tuning, and inference using Hugging Face Transformers and PyTorch.
- Evaluated the model using accuracy, precision, recall, weighted F1, confusion matrix, and ROC analysis, achieving approximately 82–83% validation accuracy.

SKILLS

- Programming Languages:** Python, C++, Java, SQL
- Core Computer Science:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks
- Software Engineering:** SDLC, Agile, Software Testing, Debugging, Regression Testing
- AI/ML:** Machine Learning, NLP, Deep Learning, Generative AI, LLM Fundamentals, Scikit-learn, PyTorch
- Databases:** MySQL, MongoDB
- Web & Backend Development:** HTML, CSS, JavaScript, ReactJS, REST APIs
- Tools:** Git, GitHub, VS Code, Google Colab
- Professional Skills:** Problem Solving, Analytical Thinking, Communication, Team Collaboration, Leadership, Adaptability

CERTIFICATIONS

- Data Structures & Algorithms using Python & Java** - Infosys Springboard
- Object-Oriented Programming using Python** - Infosys Springboard
- Explore Machine Learning using Python** - Infosys Springboard

EXTRA CURRICULAR & ACHIEVEMENTS

- Winner - CSE Department Coding Competition
- Co-Lead - Smart India Hackathon 2025, coordinated technical development, task allocation, feature prioritization, and module integration.
- Group Lead - College Summer Learning Initiative, led a 5-member peer-learning group focused on DSA, aptitude, and MERN development.
